

NOVELTIES 2025

Botte: the shape of harmony

Designed by **angelettiruzza design**, the new **Botte** series explores the beauty of pure geometry. Soft, full volumes interact with fluid, continuous surfaces, giving life to a design that is essential yet rich in personality.

A collection that conveys balance and visual calm, created for bathroom spaces where the everyday gesture becomes a sensory experience.

Essential, rounded, contemporary.

With Botte, **Cristina Rubinetterie** presents a new vision of the faucet as a sculptural element. The cylindrical inspiration translates into balanced proportions, refined materials, and coherent details. The result is a transversal and versatile collection, interpreting the language of contemporary design with authenticity and elegance.

FROM YELLOW TO GREEN

From product to experience: the path toward a holistic, natural, and human approach

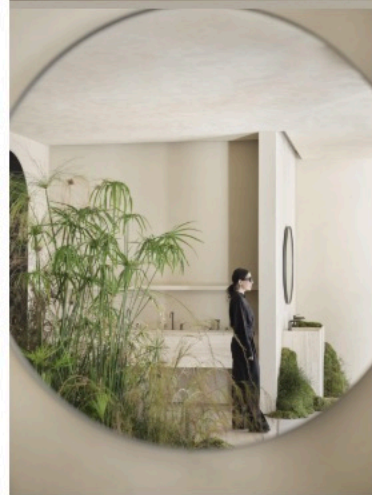

On the occasion of **ISH Frankfurt 2025**, we presented a stand conceived as a space to live in, not just to observe. Green was the protagonist: numerous potted plants and a wall made of stabilized greenery transformed the space into a welcoming and multisensory environment.

A holistic interpretation of design, where nature, aesthetics, and function dialogue in balance. Green becomes a symbol of an evolved vision of wellness, putting people and quality of life at the center. Because today, more than ever, designing means taking care.

NEDA

A gesture of slow, essential,
poetic design

During **Milan Design Week**, **CRISTINA Rubinetterie** presented **NEDA**, the installation by **Elisa Ossino Studio**. An immersive experience that invites us to slow down, to listen to the material, to be guided by the rhythm of water and light.

The sculptural gesture of the project blends with natural stone in a suspended, meditative, essential space. Inspired by the springs of the **Licei Mountains**, a mythical place linked to the birth of Zeus, **NEDA** is a reflection on time and the beauty of daily gestures, where design does not speak loudly, but leaves a deep mark.

Terme Neroniane

Nature, design, and wellness

In the heart of the **Euganean Hills**, the new suites of the **Terme Neroniane SPA Resort**, designed by architect **Michele Perlini** of **ARCStudio Perlini**, offer hospitality inspired by nature and deep well-being. Sustainable materials, integrated technologies, and biophilic design create harmonious and relaxing environments.

The **Pic** series, signed **CRISTINA Design Lab**, blends in elegantly, contributing to a sensory experience designed to regenerate body and mind.
