RUBINETTERIE

FOCUS FINISHING

## The Art of Detail

The finishing of the CRISTINA Rubinetterie mixers are the result of a careful design and engineering process.

The vast range offers from the most classic finishing such as chrome to the boldest ones such as polished PVD Gold Brass allowing for customization and superior durability.

Designed to enhance the beauty and functionality of our mixers, they make each product impeccable and resistant to the test of time.

Discover all our finishings on the CRISTINA Rubinetterie website and be inspired for your next project.

## A step towards the future with the recovery of plastic

We are happy to announce an important progress in our journey towards sustainability: the collaboration between CRISTINA Rubinetterie and iMilani, a leading company in the molding of plastic crates and containers for over fifty years.

Thanks to this project, our disused plastic crates were transformed into new resources: after being taken from our company, they were ground and subsequently transformed by **iMilani** into new plastic containers, robust and recycled, ready for a new cycle of life.

This project demonstrates how collaboration between companies can shape a more sustainable and responsible future.

CRISTINA BRERA

## Creativity and design do not stop

Although the year has just begun, CRISTINA Rubinetterie's enthusiasm and commitment continue unabated.

In fact, we inaugurated 2024 with an interesting workshop that explored the integration of acoustics in architectural design, revealing how sound design can enrich the environments in which we live.

But it doesn't end here: until January 31st, our CRISTINA Brera showroom is also hosting a ceramic Pop-Up in collaboration with the artist and architect Tanja Haramincic, founder of Claytical Ceramics.

Tanja is known for her ceramic creations that tell playful and creative stories, exploring techniques and production processes focused on circularity and upcycling.

We are waiting for you in the showroom to admire these unique works of art up close!

## Un Loft a Kyiv

In this edition of "Cristina Around the World", we take you to Kyiv, Ukraine, where an interior project designed by the studio Behind The Walls has managed to stand out in the international design panorama.

Located in the modern Comfort Town complex, the apartment combines various styles in a unique harmony. In the bathroom, we chose to use our Tricolore Verde series, creating a sophisticated and never banal environment.

This interesting project obtained the prestigious Architecture MasterPrize 2023, a sign of the international recognition of the quality and excellence in design to which our products can contribute.
