# The mixer that transforms the essential into pure poetry

DESIGNED BY ANGELETTIRUZZA DESIGN, THE NEW 2025 SERIES BY CRISTINA RUBINETTERIE CELEBRATES THE PERFECT FUSION OF AESTHETICS AND FUNCTIONALITY, OFFERING A SENSORY EXPERIENCE INSPIRED BY NATURE

**F**ounded in 1949 by Ezio Cristina, the company was among the first to introduce the thermostatic mixer. Today, as part of the Caleffi group, Cristina Rubinetterie continues to innovate and bring quality into homes worldwide.

## Series BOTTE, harmony and essentiality in contemporary design

BOTTE speaks a language of sinuosity and balance. Every detail has been crafted with

precision, with particular attention to the spout, resulting from a targeted study to create an impeccable connection. This element returns to the mixer, a harmony inspired by natural forms: a water droplet, a wind-sculpted dune, soft lines that evoke delicacy and serenity. BOTTE's fluid and harmonious surfaces transform space into a place of welcome and sweetness.

"Forms speak. We love listening to them," declare the designers, emphasizing how BOTTE embodies the essence of objects that combine lightness with a distinctive personality. Designing a faucet like BOTTE is an alchemical process: a balance between form, technique, and production that gives life to a unique product. BOTTE represents the perfect synthesis between tradition and contemporaneity, with an identity that dialogues with the present and looks to the future.

The BOTTE series represents an ideal combination of contemporary design and functionality, enriched by a broad and sophisticated range of finishes designed to satisfy every aesthetic and design requirement. Among these, three new proposals stand out:

- 55P: Infinity Black PVD - A glossy black of extraordinary intensity and warmth, obtained through PVD technology. Perfect for sophisticated environ-

ments, it provides an exclusive and refined visual effect.

- 76: Imperial Black - A galvanic finish with a unique charm, with a brushed effect reminiscent of a dark and deep chrome black. Ideal for those seeking elegance and character in a timeless design.

- 93: Brushed Matte Antique Brass - This warm and material finish recalls a timeless elegance, reinterpreted in a contemporary key.
